

February 24, 2006

I was told by my doctor that I had carpal tunnel and would need an operation. In July 2004, I started going to Dr. Christine Miller for treatment for the carpal tunnel. I feel Christine cured the carpal tunnel. At this same time, I found I was diagnosed with Rheumatoid arthritis. Christine treated my right hand, left hand, right knee and left knee. With Christine's help, I have been able to control my pain. I have also developed a pain in my right shoulder, for months I was unable to lift my arm up and down. The pain was so bad; I was unable to sleep at night.

I have taken all kinds of medications for my arthritis; I feel that without Christine's help, I would not be able to control my pain. I am happy with the results I have had with Christine's laser treatments.

Sincerely yours,

Rachel Jones

Thank you, so much Christine
