

Christine

Just a note of thanks. As you know I was having serious problems with my feet stiffening up after long walks such as when golfing or when touring cities while traveling. You began a series of low intensity laser treatments and recommended the Par Flex orthotics and an improved walking style with less heel strike. After 4 months the problems have mostly disappeared and I am so thankful. The other fun side effect is that my golf game has improved as the manufacturer of the orthotics mentioned. I still have trouble believing that but it is hard to ignore the results. Again, thanks much and it was also such a pleasure working with you.
