

To whom it may concern,

I'm writing this letter to share my experience that I had working with Christine Miller in Laser Therapy. I started getting a sore hip in 2008. Every time I got up from sitting it hurt a lot. It got worse as time went on. I tried lots of different modalities: acupuncture, diet, chiropractic, massage, and nothing worked. I had an ex-ray and the preliminary diagnosis was spinal stenosis. I then had an MRI. A neurosurgeon read the results and agreed that I had stenosis but the pain in my hip came from arthritis.

His prescription was anti inflammatories. I did not want to spend my life on those pills. Some of my friends had been to Christine Miller with good success and I decided to give Laser Therapy a try. Christine promised nothing and said let's see what happens. It worked!

After 18 treatments I was totally out of pain. I can work very hard in the garden, cutting firewood, working out on the Stairmaster and have had no pain in 2 years.

Christine was wonderful, great bedside manner, and I am totally grateful.
